PROFESSIONAL EXPERIENCE

AMERICAN FUND, INC.

Richmond, VA • 2002 - Present

Vice President, Financial Systems: Enterprise Data Intelligence (2009 - Present)

Vice President, Financial Systems: Controller's Office (2008 - 2009)

Built and lead Business Intelligence (BI) Competency Center. Spearhead alignment of technical and non-technical business areas. Manage BI implementation using Oracle Business Intelligence software. Oversaw shared services organization with SOX compliance responsibility for the CFO office with touch points at every company level. Led organization of 25 in systems support and development activities, including: payroll, loan portfolio and analysis, accounting, loan accounting, treasury, human resources, debt derivatives, and investments.

Selected Results:

- Reduced by 700% completion time of loan loss provision seasonality analysis. Introduced Oracle enterprise solution that replaced error-prone, stand-alone spreadsheets.
- Implemented PeopleSoft HR self-service applications that saved 35,000 sheets of paper and transitioned three FTEs to more valuable work assignments in first six months. Eliminated request processing, tardiness, and repeat submissions.
- Initiated company's first BI solution for CFO division that currently contains 66 monthly loan snapshots (25 million rows each), serves 250 users, and shut down two redundant environments. Developed case using prototype built on Hyperion and Oracle Business Intelligence software.
- Enabled daily adjustments to product marketing plan by producing interactive dashboards that allow self-service analysis of Smart Option loan program by all levels of users.
- Created publicity vehicle for service value of Data Quality Team. Built metadata model as basis for reporting dashboards used by the Data Governance Council and executive sponsors.
- Modernized Data Warehouse in Finance/Accounting area. Increased query performance up to 100X and eliminated query tuning with use of Netezza database appliance.
- Led implementation of BI Competency Center that enabled first consistent partnering between Finance/Accounting and IT areas.
- Established shared services organization within CFO division which remedied non-holistic representation of IT needs. Enabled human capital redeployment and expanded career paths. Also improved project planning and created project synergy opportunities.

Managing Director, Financial Systems: Controller's Office (2005 - 2008)

Led Hyperion system application team, implementing: planning, workforce planning, web analysis, reports, and master data management. Oversaw PeopleSoft Finance application.

- Directed imaging system initiative that reduced accounts payable call volume 90% and offsite storage costs 50%.
- Promoted and implemented PeopleSoft Treasury application that eliminated 95% of errors and workarounds from daily bank statement transactions.
- Won executive support for third-party assessment of data warehouse environment. Resulted in precise corrective recommendations and initiation of the BI data warehouse roadmap as part of enterprise-wide data improvement project.
- Led proof-of-concept and vendor evaluation between Business Objects and Oracle Business Intelligence. Implemented Oracle solution thereby establishing first BI strategy and standard tool set.
- Enabled automatic simultaneous production of SEC 10-Q and 10-K documents. Hired and led MS SharePoint consultants to complete project within 90 days.

Director, PeopleSoft Development: Controller's Office (2002 - 2005)

- Eliminated 90% of spreadsheets (8,000 to 800) in budget process and enabled business areas to view fully-loaded budgets in real time (from a four day wait) by implementing Hyperion Planning application.
- Reduced PeopleSoft upgrade times 50% (eight to four months) by adopting best practices. Program included transition to PeopleSoft 8.8.
- Enabled executive leadership to review collective or unique financial information for four acquired companies with independent accounting systems. Converted data for use in enterprise PeopleSoft application.
- Met external audit requirements by creating general ledger reconciliation tracker application built inside PeopleSoft application. Automated manual spreadsheet process.
